

Maritime Life Building - Elevator Cab Interiors

Location Toronto, Ontario
Designer / Architect WZMH Architects
Duration May 2001 - Sep 2001

Scope - Soheil Mosun Limited was contracted to fabricate and install custom interior finishes for (9) passenger elevator cabs and (2) parking shuttle elevator cabs for the Maritime Life Building in downtown Toronto.

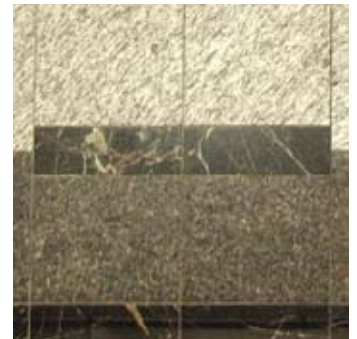

Highlights - These elevator cabs feature anigre veneer paneling with stainless steel trim. Handrails are solid wood and the ceiling is painted aluminum formed in an undulating shape to match the main lobby ceilings of the building. Floor is lightweight, thin cut granite. Etched mirrors are featured in the rear corners of the cab with a large rectangular slab of etched and sandblasted glass complementing the rear wall of the cab.

Anigre veneer panels and stainless steel trim

Painted aluminum ceiling carries the undulating design from the lobby into the elevator cabs

Detail of white, grey and black granite floor

High quality anigre veneer with stainless steel trim and reveals, unifies the look of the interior
